## **Subtracting Fractions With Like Denominators**

Find the difference.

$$\frac{5}{37} - \frac{2}{37} = --$$

$$\frac{30}{49} - \frac{2}{49} = --$$

$$\frac{4}{6} - \frac{2}{6} = -$$

$$\frac{5}{37} - \frac{2}{37} = - \begin{vmatrix} \frac{30}{49} - \frac{2}{49} = - \end{vmatrix} = \frac{4}{6} - \frac{2}{6} = -$$

$$\frac{5}{24} - \frac{2}{24} = - \begin{vmatrix} \frac{20}{28} - \frac{3}{28} = - \end{vmatrix} = \frac{4}{20} - \frac{2}{20} = -$$

$$\frac{20}{28} - \frac{3}{28} = -$$

$$\frac{4}{20} - \frac{2}{20} = -$$

$$\frac{26}{28} - \frac{25}{28} = \frac{15}{44} - \frac{11}{44} = \frac{10}{11} - \frac{4}{11} = -$$

$$\frac{15}{44} - \frac{11}{44} = --$$

$$\frac{10}{11} - \frac{4}{11} = -$$

$$\frac{13}{17} - \frac{8}{17} = --$$

$$\frac{13}{17} - \frac{8}{17} = \frac{12}{33} - \frac{8}{33} = \frac{9}{40} - \frac{5}{40} = -$$

$$\frac{9}{40} - \frac{5}{40} = -$$

$$\frac{19}{39} - \frac{4}{39} = --$$

$$\frac{19}{39} - \frac{4}{39} = - \qquad \frac{9}{20} - \frac{5}{20} = - \qquad \frac{31}{48} - \frac{3}{48} = -$$

$$\frac{31}{48} - \frac{3}{48} = -$$

$$\frac{9}{27} - \frac{7}{27} = -$$

$$\frac{27}{46} - \frac{18}{46} = -$$

$$\frac{9}{27} - \frac{7}{27} = \frac{27}{46} - \frac{18}{46} = \frac{9}{13} - \frac{7}{13} = -$$

$$\frac{14}{37} - \frac{9}{37} = - \begin{vmatrix} \frac{17}{48} - \frac{11}{48} = - \end{vmatrix} \frac{8}{17} - \frac{4}{17} = - \begin{vmatrix} \frac{9}{19} - \frac{5}{19} = - \end{vmatrix} \frac{18}{25} - \frac{5}{25} = - \begin{vmatrix} \frac{11}{30} - \frac{8}{30} = - \end{vmatrix}$$

$$\frac{17}{48} - \frac{11}{48} = --$$

$$\frac{8}{17} - \frac{4}{17} = --$$

$$\frac{9}{19} - \frac{5}{19} = --$$

$$\frac{18}{25} - \frac{5}{25} = -$$

$$\frac{11}{30} - \frac{8}{30} = --$$
